PROJECTS

Virtual Cardiology Assistant | Developer

June 2023

1

- Developed, trained, and finetuned an AI model in Python using Scikit-learn to create an intelligent virtual assistant for cardiologists, reducing patient wait times and increasing efficiency for doctors offices, and able to predict the likelihood of a heart attack.
- Built a user-friendly web application using HTML, CSS, and Flask, allowing convenient access to the virtual assistant on various devices
- Implemented MongoDB integration for secure and scalable patient database, enabling storage and retrieval of data for hundreds of patients. Enabled AI model training by providing previously nonexistent data source.

Spotify Project | Developer

May 2023

- Produced a cross-platorm Android and iOS mobile app integrating artist information, a "Guess the Song" functionality, challenging users to identify a song from their playlist from a 30-second clip, and a playlist analyzer.
- Utilized React Native and connected the app to the Spotify API, allowing users to access and explore information about their favorite artists and songs

Reboot2Kids | Founder

2019-2022

Organization providing clean water and digital literacy for school children in Sierra Leone & Papua New Guinea

- Fundraised and received grants, raising \$33,600 to provide smart clean water systems & computer labs
- Published book "Water Well: a resource on clean water for local communities" to help individuals/small communities self-implement access to clean drinking water
- Developed app "Water Well" for school children with resources and interactive material, available on Google Play
